## 4x3D Dash Cubby Instructions

Thank you for choosing a custom 4x3D Dash Cubby Insert! Transform unused spaces into functional setups with ease.

### Installation Instructions

1. Remove the OEM rubber mat from the cubby area.
2. Align the Dash Cubby Insert with the cubby space.
3. Note: It is designed to fit snugly for a secure installation.
4. Gently press the insert into place, ensuring that the bumps on the bottom lock into place.
5. Important: If you push the insert into place before drilling or modifications, you may need to remove the dash cover to take the insert back out. Use a small screwdriver through the holes on the bottom of the cubby to gently push the insert out.

### Customizing Your Insert

Your Dash Cubby Insert is designed for flexibility. Here are some customization tips:

- Drill holes to add switches for auxiliary lights, winches, or other accessories.
- Use mounts like the Bulletpoint or Steelie Dash Mount to secure phones or other devices.
- Add universal ball mounts or custom attachments to suit your needs.

Reminder: Always ensure that modifications are done carefully to maintain a secure fit.

### Support

If you have any questions or need additional support, feel free to contact us at [4x3D.com/contact-us](http://4x3D.com/contact-us) or email us at [4x3dsales@gmail.com](mailto:4x3dsales@gmail.com).

Thank you for choosing 4x3D—enjoy the journey!
